

USAID
FROM THE AMERICAN PEOPLE

The Lishe Endelevu activity will improve the nutrition status of women, children and adolescents across four regions of Tanzania.

TANZANIA

LISHE ENDELEVU - SUSTAINABLE NUTRITION

Despite progress and government support, undernutrition remains a significant problem in Tanzania. The Government of Tanzania has demonstrated its commitment to nutrition through the National Multi-sectoral Nutrition Action Plan (NMNAP) complemented by sectoral and cross-cutting policies, frameworks, and structures. The plan confirms the Government of Tanzania's commitment to reduce stunting in children under age 5 from 34 to 28 percent by 2021. USAID will contribute to this national goal by:

- Reducing stunting in children under age 5 in four target regions.
- Increasing the proportion of women of reproductive age consuming a diet with a minimum acceptable diversity of foods.
- Increasing the proportion of children age 6-23 months receiving a diet with a minimum acceptable frequency of feeding and diversity of foods.

EXPECTED RESULTS

Lishe Endelevu (Swahili for “sustainable nutrition”) will reach over 1.5 million women of reproductive age, 1.1 million children under age 5, and 330,000 adolescent girls 15-19 years of age in Dodoma, Iringa, Morogoro and Rukwa regions.

Planned outcomes for the activity include:

- Strengthened multi-sectoral coordination for improved nutrition at local government level.
- Improved health, nutrition, caregiving and water, sanitation and hygiene (WASH) behaviors.
- Increased access and availability of diverse, safe, and nutritious foods.

OBJECTIVES

Lishe Endelevu will support the Government of Tanzania to increase and improve:

- Capacity of local government authorities (LGAs) to implement NMNAP at the local level.
- Civil society & private sector communication with LGAs for effective coordination of community-based nutrition programs.
- Access to and delivery of quality nutrition services at facility and community levels.
- Household production and consumption of nutrient-rich foods.
- Equitable control over household resources and income generation for dietary diversity.

ACTIVITIES

- Train LGAs and health staff to implement activities aligned with NMNAP, as well as budget and plan for the delivery of nutrition services, and improve allocation and use of resources.
- Work with LGA and committees at all levels to encourage women's representation and leadership in shaping a responsive local agenda for nutrition in their communities.
- Support LGAs to identify and engage nutrition stakeholders in civil society and the private sector.
- Through on site clinical mentoring, build the capacity of health workers to provide improved nutrition services and counseling.
- Train Community Health Workers/Volunteers (CHW/V) on social behavior change strategies and community-based platforms to promote optimal nutrition and WASH behaviors.
- Work with CHW/Vs and model farmers to establish village demonstration plots for improved crop production, small livestock and aquaculture, and consumption of nutrient-rich foods.

BUDGET \$19.7 million

DURATION

October 2018 – September 2022

ACTIVITY LOCATIONS

USAID Lishe Endelevu will improve the nutrition status of women, children and adolescents across four regions:

- Dodoma (6 Councils)
- Morogoro (all 9 Councils)
- Iringa (3 Councils)
- Rukwa (all 4 Councils)

IMPLEMENTING PARTNERS

- Save the Children International (Lead)
- Deloitte
- The Partnership for Nutrition in Tanzania (PANITA)
- Africa Academy for Public Health (AAPH)
- Manoff group
