There are children in crisis across the nation – your employees can help by donating online today through your own Virtual Care Drive!

Across America, school districts are making the difficult decision to close due to COVID-19. An unintended consequence for children in under-resourced communities is the loss of learning and instruction time, leaving them more vulnerable to falling significantly behind and at risk of not being able to catch up.

As the global leader in early childhood education, Save the Children is committed to helping children and families during this uncertain time by providing learning resources - educational toys, books and materials - to support out-of-school activity and reduce learning loss.

We have partnered with YouGiveGoods, an innovative giving platform that gets tangible aid to those in need.

Create your own Virtual Care Drive, coordinated through YouGiveGoods, and contribute to Save the Children’s rapid response to COVID-19.

Get involved in 3 simple steps:

1. Contact your Save the Children representative.
2. Employees choose items to donate to your drive.
